

To our Valued Customers,

As of October 3rd, 2016 Fox Electronics has been divested from our former parent company IDT. As part of this divestiture, our XpressO and XpressO Ultra line of products have been integrated into IDT and must now be purchased through IDT or an IDT sales channel.

Fox will continue to offer world class Crystals, Oscillators, TCXOs, VCXOs, OCXOs, and cutting edge Automotive Crystals and Oscillators. Returning to private ownership will allow us to refocus on servicing our customers with the high quality, customer centric service we have built our reputation on.

Over the next few months you will see many positive changes that will benefit our customers, from a new part# structure, new pricing guidelines, and new sales automation, all with the intent of making Fox your first choice in Frequency Control.

One thing that hasn't changed is our highly regarded Customer Service and Management personnel, with the majority of the Customer Service team having over a decade at Fox and the management team having over 25 years at Fox we have the experience and knowledge to assist each one of you, to smoothly transition through these changes and minimize any disruption.

We look forward to continuing and strengthening our relationship with you, our most important asset, our loyal customers.

Sincerely,

Tia Trefethen
